

My comment is regarding the LPFM issue. If this is enacted then a radio station that I listen to on a daily basis could be taken off the air. K-Love is a vital part of my day, I drive a truck and listen to it almost all day long. This station has an uplifting message and is a great service to the listening area. If K-Love was off the air it would leave a void on the radio. A lot of people depend on the message K-Love gives to just make it through the day. i definately think that K-love is providing a public service in that it is the only station of it's kind in my area. I need the message that K-Love is providing me . Please reconsider steps that might take this station off the air. Thank you for your time
